

GET RID OF HEEL PAIN THE RIGHT WAY

Debarati Sen
@timesgroup.com

Our frenetic lifestyle and poor dietary habits often leave us with heel ache. People who suffer from this complain that the pain is usually intense in the mornings or after a long period of rest but gradually subsides as the day progresses. If the issue is not addressed on time it can lead to heel spur: Its first stage is known as Plantar Faciitis. This is usually caused by erratic movement/altered alignment of the foot, resulting into soreness and inflammation of the area where the plantar fascia (the thick connective tissue which supports the arch on the bottom of the foot) joins the heel bone.

WHAT IS IT?

Heel spur is an abnormal growth where the plantar fascia pulls away from the heel area, causing a thorn shape-like bony protrusion. This can cause extreme pain and inflammation in and around the heel area while you are standing or

walking. It's common among athletes.

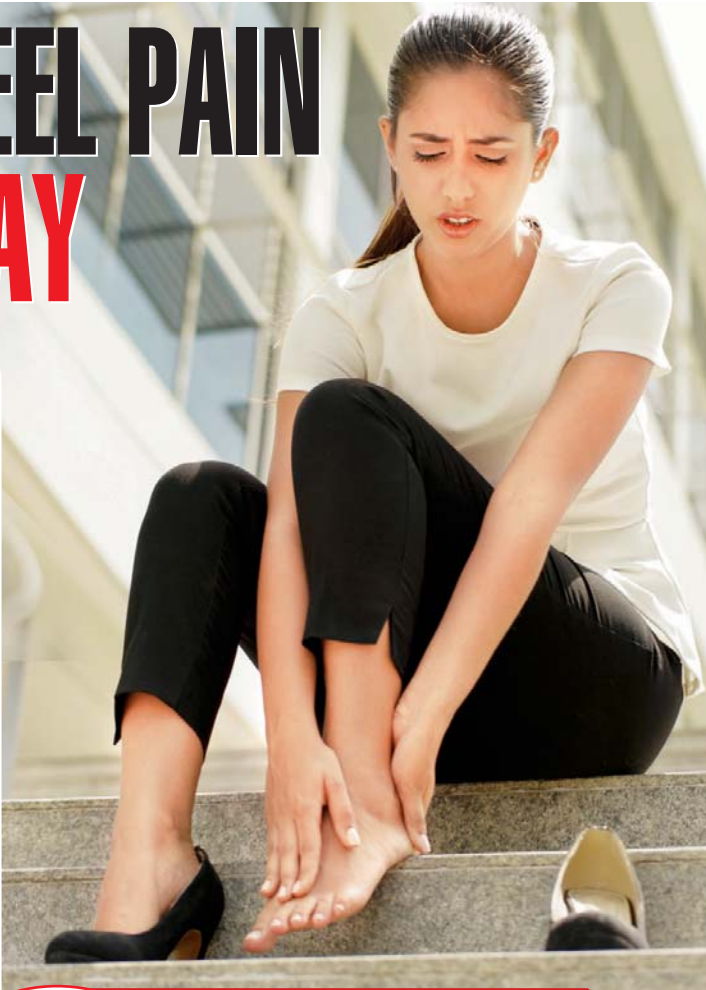

HOW IS IT FORMED?

Heel spur is caused by strains on foot muscles and ligaments. Researchers have stated that men are more prone to this syndrome. Poorly fitted or badly-worn shoes, especially those lacking appropriate arch support, also cause major damage to the foot which eventually leads to this problem. This syndrome can also be caused due to your foot structure.

HOW TO TREAT IT

One should treat heel pain by supporting the plantar fascia to avoid erratic movement and excessive pressure on the heel and frequently applying cold compression to eradicate soreness/inflammation.

Experts also suggest wearing orthotic footwear and insoles to support the fascia, doing stretching exercises, losing weight and elevating the heel with the use of a compression foot sleeve.

EXERCISES TO CURE HEEL PAIN

Before working out, always do stretching exercises to loosen the muscles. The following exercises help to cure heel pain:

1 Lean against a wall with one knee bent and heel on the ground. The heel arch and foot arch should be stretched. Hold this position for 10 seconds. Repeat it for 20 times for each sore heel.

2 Sit on the floor or on a mat with your feet stretched in front of you. Roll up a towel length horizontally. Loop it over one foot and pull it towards your body to stretch the front of your foot. Repeat it with the other foot.

3 While sitting, roll your foot back and forth on a frozen bottle of water or ice-cold can. Continue for one minute and switch on to the other foot.

Beware

OF HEEL SPUR
Heel pain is quite common and goes unnoticed till it aggravates. Treat the pain at an early stage to avoid formation of heel spur. If it's not addressed on time, it can affect your lifestyle, mobility and gait which can lead to lower limb deformities as you age.

SIMPLE REMEDIES

- Occasionally foot pain can be related to stress. The body may respond with generalised tension that contributes to pain in many areas, including the feet. So try to lead a stress-free life.
- Ice packs offer quick relief from swelling and pain. Apply an ice pack on the heel spur for 15 minutes and repeat if needed. Ice helps to numb the area and the cool comfort also reduces inflammation.
- Change your footwear if the pain is prolonged. Avoid high heels. Opt for well-fitting shoes and buy new footwear as soon as you notice signs of wear and tear.

Pucker up, grow a moustache and take a selfie — all for a cause

CONTINUED FROM FRONT FLAP

CAUSE: SUICIDE PREVENTION

The second Thursday in September is known as R U OK? Day, dedicated to reminding people to ask friends, family and colleagues a simple question — "R U OK?", to encourage people to connect with others in a meaningful way regularly. Hugh Jackman has used the hashtag #ruok to encourage people to start conversations and listen, and Richard Branson has also supported the cause.

CAUSE: ALS (AMYOTROPHIC LATERAL SCLEROSIS) AWARENESS

Last year, the Ice Bucket Challenge — which had people dumping ice water on their heads to promote awareness of ALS — went viral. The idea was to get people to experience what life is like for a person who suffers from the condition and to get them to donate funds to the ALS Association. Celebs like Oprah Winfrey, Benedict Cumberbatch and Bill Gates made videos of themselves accepting the challenge and nominating their star pals to take it up.

CAUSE: PROSTATE CANCER

Men grow their moustaches in November to generate awareness about men's health issues like cancer, depression in men, etc., by using the hashtag #movember with their tweets and selfies on social media. This is an annual event. Some even track how much their moustaches have grown through the month before they shave them off.

David Beckham doesn't have any acting ambitions

CONTINUED FROM PAGE 1

When asked if he will be the new James Bond, David replied, "I haven't been contacted yet. That's not something that I want to do. There have been people saying this is the launch of

my next career. Guy Richie asked me to be in a few things and I've done it, but just out of fun — I've enjoyed it, but that's as far as it will go." David also said the best thing about retirement is getting to spend quality time with family. David said, "I will always miss the game because I played for 22 years, and it was all I ever wanted to do as a kid, but it's been a kind of easy transition really, no challenges. I get to spend more time with my family. I still travel a great deal for work, but now I go away for 10 days and then I'm home for six weeks."

BIRTHDAY TODAY
You are emotionally strong and it will give you the strength to deal with life's reverses.
Tip: Your lucky colours are red and blue. Your lucky gems are black pearls and black diamonds.
You share your birthday with: Jackie Sandler

ARIES March 20 - April 18

A relationship problem may cloud your day. Try to open up or get the person you are dealing with to discuss pending concerns. Communication is the only way to fix what's wrong. Something about your connection with a certain person makes you want to downplay your accomplishments.

TAURUS April 19 - May 19
Take control of any situation that has to do with a business or personal partnership. The way you handle people and issues will determine how far you can get. You will surprise everyone with your choices, especially when love enters the picture.
GEMINI May 20 - June 20
Don't take promises made to heart; they aren't likely to manifest into anything unless it benefits the person doing the offering. There are no freebies today. When working with a partner, it's better to do things together instead of talking about things together.

CANCER June 21 - July 21
Follow your heart, not your head. Don't be afraid to act on impulse. If you love someone, be vocal. Love is in the stars and not following through will be a lost opportunity. A creative project will be profitable. You have much to offer, and now it helps to pinpoint, at least in your own mind, exactly what you bring to relationships.

LEO July 22 - August 21
You may be looking for change or something new but don't make alterations without doing ample research. Chances are, what you want and what you get will differ drastically. Be smart regarding what you offer others. Look at the little signals someone gives you.

have bad advice simply because they are uninformed about the nuances of your situation. Move only when you feel inspired. No need to drop hints. You know what you want and the best way to get it is just to say it.

SCORPIO October 23 - November 20
Do your best and stop worrying. Put yourself out there and don't be afraid to display what you have to offer. Unless you share, you cannot expect to get results. People have to get to know what you are all about and how sincere you are.
SAGITTARIUS November 21 - December 20
Do what you can for someone who needs your help and you will avoid criticism and complaints. Not paying enough attention to home and family will result in tension and actions beyond your control.

CAPRICORN December 21 - January 19
Make a call or send an e-mail to someone you miss or who is from your past. Reconnecting with old friends or visiting places you haven't been in a long time will inspire you to pursue goals you set when life was less complicated.

AQUARIUS January 20 - February 18
It's a money day. Spend wisely, invest in what you know and do best and put something away for unexpected expenses. Good things are heading your way. Look over contracts and personal papers.

PISCES February 19 - March 19
You are getting plenty of nice comments these days and people want what you're selling, too. It's nice to know you're popular. Of course, it will be nicer when they put their money where their mouths are. You will make wise choices and can negotiate deals easily.
